

Supportive Clinical Information Oral Sucrose for Procedural Pain Management – less than 12 months of age

Sucrose 24% Solution: Best results are achieved when used in combination with other comfort measures such as non-nutritive sucking (eg. gloved finger, pacifier), swaddling and skin-to-skin contact.

Infant's weight	Suggested Dose
Any NPO infant	give in increments of 1 drop – 2 drops (0.04 mL – 0.08 mL) up to suggested weight-based dose
Infants less than 1200 grams	up to 5 drops (0.2 mL)
Infants 1200 – 1500 grams	up to 10 drops (0.4 mL)
Infants greater than 1500 – 2500 grams	up to 25 drops (1 mL)
Infants greater than 2500 grams	up to 50 drops (2 mL)
Infants greater than 5000 grams	up to 63 drops (2.5 mL)

Note one drop of Tootsweet® = 0.04 mL.
